

Malcolm Lawrence

Recent Client Engagements

- For a mechanical engineering client, drafting a new patent specification of over 120 pages length and having 60 Figures.
- Strategic advice on the validity of a European patent relating to a drug delivery system.
- Independent strategic advice to a company Board on future management of a life science patent application portfolio not under our care.
- Tactical advice on claim form and presentation in relation to a biological assay apparatus and method.
- For a mechanical engineering client, structuring the claims of a later European patent application to avoid conflict with an earlier application of same party under the “*whole conflict*” rules of EPC law.
- Preparing an IP Audit report for an electrical engineering client in connection with a now successful government grant application.
- Advising a client in the microorganism field on key IP aspects of a government grant application.
- For clients in the chemical industry, providing an opinion on the conditions for determining whether an activity may infringe a restored but previously lapsed UK patent.
